NEIGHBORHOOD CONTEXT

Miami Beach was so very different back in 1921 when this simple one story vernacular style residence was designed and constructed at 803/805 2nd Street in the section of Miami Beach known as Ocean Beach. The neighborhood surrounding this building location in the 1920's - was one of the city's then local 'epicenters' of activity...with three Bathing Houses within a three block walk on Ocean Drive plus hotels and the Dog Track and Joe's Stone Crab Restaurant nearby.

Situated at the southern tip of present day Miami Beach and surrounded by a magnificent expanse of tropical blue water and boundless sky, Ocean Beach became a magnet for pioneer tourists and adventurous residents of fledgling Miami in the early twentieth century." (1)

"The Ocean Beach Historic District includes parts of the original Ocean Beach Subdivision platted in 1912 and parts of Ocean Beach Additions 3 and 4 platted in 1914, as well as part of the Friedman and Cope Subdivision platted in 1917. The location of these boundaries has been determined through careful investigation and research of building records. The demographic areas south of Sixth Street which possess a significant concentration of buildings and sites that are united by the historical development of Ocean Beach as a vibrant but modest seaside resort, abundant with enticing recreational amenities for the working class, and unusually welcoming to persons of Jewish heritage." (2)

"By 1912, this idyllic aquatic resort area had begun to attract the interest of a cast of personalities who would, in their own ways, play important roles in the development of Miami Beach as a destination in the sun." (3) "The first planning act occurred in 1912, when two Miami bankers, John N. Lummus and James E. Lummus, formed the Ocean Beach Realty Company and platted a small ocean-facing portion of their land at the southern tip of Miami Beach." (4)

And even more importantly culinary-wise, Joe & Jennie Weiss originally opened Joe's Stone Crab Restaurant at 213 Biscayne Street (now South Pointe Drive) in 1912. In 1920 the second building was built at South Pointe Drive & Washington Avenue which still exists, though expansions in the 1930's and 1990's enveloped the original building on site. (17)

LOWER PHOTO: BISCAYNE PLAZA THEATER

"...as late as 1917, Miami Beach was described as a wilderness. It was a sub-tropical barrier island comprising three interrelated eco- systems; a beach along the Atlantic ocean-front that merged with the dunes and the remnants of earlier coconut tree plantings; a low scrub forest in the interior; and a belt of mangroves facing Biscayne Bay on its west side." (5)

"In South Beach the Ocean Beach Realty Company assembled the traditional elements of a seaside resort city: an 'oceanfront' board- walk' as the setting for an architectural promenade; 'bathing casinos' built along the ocean; an entertainment pier and a mix of homes, hotels and boarding houses." (6)

"During the 1920's and 1930's Ocean Beach south of 6th Street became a thriving seaside resort and recreational area. The 1935 Franklin Survey of Miami Beach records several substantial recreational facilities" - including the following establishments: (7)

- * Hardie's Beach Casino-- on the Ocean between 1st & 2nd Sts
- * Biscayne Plaza Theater--SW corner Biscayne St. & Collins
- * Collins Arcade--SE corner of 5th Street and Collins Avenue
- * Cook's Casino--SE corner of 5th Street and Ocean Drive.
- * Dixie Bathhouse - SE corner of 1st Street and Ocean Drive.
- * Grandstand & Club House--foot of Collins + Government Cut
- * Miami Beach Kennel Club (racetrack)--foot of Ocean Drive on Biscayne Street
- * Million Dollar Pier--on the Ocean at the east end of Biscayne Street
- * Minsky's Burlesque--Million Dollar Pier - see Top Middle Photo this page

1927 AERIAL PHOTOGRAPH ABOVE (7)

"Ocean Beach below Sixth Street was clearly not built for the social elite as areas further north were. The Lummus brothers development philosophy was to build a modest resort community by the sea welcoming to the common man. The small scale and simplicity of the architecture is reflective of this attitude and is a significant characteristic of the area. The generally modest Art Deco and Mediterranean Revival hotels on the east side of Ocean Beach were complemented by simple Bungalow blocks on the west side. Handsome two and three story apartment houses reflecting their period of construction filled the center of Ocean Beach. Some of these were small Art Deco gems." (8)

"Eventually a strong Jewish retail, institutional and residential presence manifested itself in Ocean Beach, especially along Washington and Collins Avenues and Ocean Drive. In the middle decades of the twentieth century, these streets were dotted with small Jewish businesses and apartments filled with Jewish tenants.(9) In a two block area on Collins Avenue between Third and Fifth Streets, for example, four Kosher markets and delicatessens later opened to serve a growing clientele.' (15)

"As the first recorded subdivision in Miami Beach, the neighborhood within the proposed boundaries of the Ocean Beach Historic District deserves overdue recognition as the birthplace of the City of Miami Beach. " (10)

Above is a portion of a map of the City of Miami Beach Historic Properties Database Historic showing the boundaries of the Ocean Beach Historic District in South Beach. The turquoise arrow indicates the location of 803/805 2nd Street which lies just inside the boundaries of the District which runs down the middle of 2nd Street. The darker blue in the map indicates contributing structures.

The irregular nature of the western boundary of the Ocean Beach Historic District was a result of maintaining the maximum political and property owner support for the District back in 1995 when it was going through the process of Historic Designation. This author was a member of the City of Miami Beach Historic Properties Database Expansion Committee which led directly to the formation of this District.

LOCATED IN THE LOCAL OCEAN BEACH HISTORIC DISTRICT

NOTE THAT A REQUEST TO THE CITY OF MAIMI BEACH BUILDING DEPARTMENT RECORDS
DESK DID NOT FIND ANY ORIGINAL DRAWINGS FOR THIS PROPERTY IN THEIR SEARCH.

1973 PHOTOGRAPH (3)

This residence was constructed in 1923 at a cost of \$4,500.00 for the owners W. L. Rowland and Miss M. E. Chesney, according to the City of Miami Beach Building Card. The building was originally constructed as duplex units.

The original Architect is unknown. This building was built during the boom times of the 1920's. It is interesting to note that the Building Card also states that in 1930 a garage was added on the property, noted as 'Owner Builds.'

"In the 1920's Miami Beach architecture consisted primarily of wood frame cottages, Mission style apartment buildings and Spanish-Mediterranean homes and hotels." (12). Mediterranean Revival architecture was the "style of choice" for the first major boom period in Ocean Beach. Its connotation of Mediterranean resort architecture, combining expressions of Italian, Moorish, North African and Southern Spanish themes, was found to be an appropriate and commercially appealing image for the new Floridian seaside resort." (13)

1989 PHOTOGRAPH (3)

The partial height CMU wall with fence above was constructed in 1989 according to the CMB Building Card. Prior to this masonry wall had been a 4'-0" high fence with two gates erected in 1975. The aluminum fold down awnings were added in 1974 according to the CMB Building Card.

From the front the building appears as a simple tripartite design with two doorway entrances at center. Sheltering these main entrances was originally a protruding gable roof above these front entrances, as shown in the photo on the previous page. Raised parapet sections further lend a simple character to the residence.

The raised parapets at corners and at center were typical details of that era. The enclosing 5'-0" high concrete block partial height wall and gates were added to the property and constructed in 1989 according to the Building Card, replacing an earlier fence.

The raised pediments on this residence are reminiscent of the same atop 112 Ocean Drive / Browns Hotel.

The building is loosely designed in the Vernacular style, which .."is not a style "per se", but rather a common method of typical early construction in south Florida... Noted for stark simplicity, vernacular structures are usually rectilinear in form with little or no elaboration. Little or no ornamentation was intentionally applied to residential or commercial structures." (14)

However in the 1995 Ocean Beach Historic District Report this building is noted on page 26 as a remaining example of the Mediterranean Revival' style of architecture. This author would disagree with this reference, since the building fits better into the vernacular mold.
