Hi Nick,

As long as the permit was issued based upon the narrower lot width, you will not need to ask for a variance for those setbacks. You are correct that the home would be non-conforming with the yard addition, and provided that you provide a greater setback on the opposite site to comply with the min 25% sum of side yard setback, a variance would not be required.

**[ THIS MESSAGE COMES FROM AN EXTERNAL EMAIL - USE CAUTION WHEN REPLYING AND OPENING LINKS OR ATTACHMENTS ]**

Hi Michael,

I hope you had a great Thanksgiving holiday. We are processing a lot split at 6444, 6450, and 6470 Allison Road and an issue has come up with respect to whether we will need to seek a variance for a side interior setback. Alejandro has asked that we confirm with you whether a variance will be required prior to Final Submittal on 12/3. The background is as follows:

- The proposed lot split seeks to aggregate half of the existing lot at 6450 Allison Road into each of the abutting lots at 6444 Allison Rd (south abutting lot) and 6470 Allison Rd (north abutting lot).

- The home at 6444 Allison Road is currently under construction under Building Permit No. BR2206430. The under-construction home provides a 10' interior side setback on the south side (10% of 100' wide lot).
- As a result of the greater lot width proposed by the application, the required interior side setback increases from 10' to 13.75'. However, since the home is under construction (and substantially completed) the interior side yard setback will become nonconforming.
- The Applicant is not proposing any new structures or increase in the nonconformity on the south side. The Applicant intends to utilize the additional land gained by the lot split on north side of the lot to develop a guest house and accessory cabana structure. The new structures and the existing home will comply with the required side interior setback on the north side and be sufficiently setback to ensure compliance with the minimum required sum of side yard setback (25% of lot width).

We understand that the new guest house and accessory structures will have to go to DRB. **Our question is whether we need to request a variance to keep the 10' interior side setback on the south side?**

Our first submittal plans are attached for reference. Please let us know if you would like a meeting to discuss.

Thank you!  
Nick

**Nicholas J. Rodriguez-Caballero**
