Historic Preservation Board
Miami Beach, FL.

Re: **Historic Resource Report:**
321 Jefferson Ave.
Miami Beach, FL 33139

The building was constructed in June 1935 for \$5,500 for the owner Ms. Eva Ulrich in accordance With Miami beach building card. The original Architect was Lester Avery, and the building was originally designed as a 7 units rental.

Nov. 1936, 3 more units and a garage was added to the building by Kington Hall Architect.

1945 some interior and reroofing repairs was done.

The construction method consists of reinforced masonry walls, wood floor framing, and wood roof framing. The building was designed with no style of architecture, and with little attention to form, function, details and proportion. Unfortunately, for some unknown reason this jail type building has been designated as a contributing historic.

The current neighborhood consists of mixtures of modern and some old art deco buildings, the existing building is totally out of contest of the surrounding building.

The building has been uninhabited for a few years, and has been condemned unsafe, my client has been trying to get a demolition permit to be able to demolish the building and beatify the neighborhood with a new four story modern apartment building with sufficient parking spaces, similar to the development Of neighboring property.

As it was mentioned in our letter of intent, we have been asked by zoning staff to keep the front façade of the existing building as part of our new proposed building, in order to expedite the progress, we have left the front façade as part of our new proposed building. I like to kindly ask the board to reconsider and letting us to demolish the building completely, since the front façade really makes no sense what so

over, I guess the only listen from this building for our future Architects would be, sample of building to not do.

I hope the HPB will help promote the revitalization of the Miami beach by approving my proposal which will undoubtedly enhance the daily enjoyment of the neighborhood by all. I respectfully request favorable action on our proposal, which will provide a building that proudly adds to the special character of the area.

Respectfully submitted by,
Fathi Architects, Inc.

A black and white photograph of a building facade. The image is heavily degraded with significant noise and artifacts. On the left, there is a large, dark rectangular area that appears to be a window or a door. To its right, there is a smaller, lighter rectangular area. The overall image is very grainy and has a high level of contrast, making it difficult to discern specific details.
