I. REQUEST

On December 8, 2020, the Historic Preservation Board directed the Planning Department to prepare a Preliminary Evaluation and Recommendation Report relative to the possible designation of the North Beach Bandshell (7275 Collins Avenue) as a local historic site.

On March 8, 2021, the Historic Preservation Board reviewed a Preliminary Evaluation and Recommendation Report relative to the possible designation of the North Beach Bandshell Historic Site located at 7275 Collins Avenue and directed staff to prepare a Formal Designation Report for the North Beach Bandshell Historic Site.

Pursuant to Section 118-591 of the City Code, on March 9, 2021 the City Commission was advised of the action of the Historic Preservation Board via LTC 099-2021.

On September 13, 2021, the Historic Preservation Board reviewed an historic designation report for the proposed North Beach Bandshell Historic Site and transmitted the designation report to the Planning Board and City Commission with a favorable recommendation.

On September 28, 2021, the Planning Board reviewed an historic designation report for the proposed North Beach Bandshell Historic Site and transmitted the designation report to the City Commission with a favorable recommendation.

On October 13, 2021, the Mayor and City Commission approved the designation of the North Beach Bandshell Historic Site on first reading public hearing and scheduled the second reading public hearing for October 27, 2021.

On October 27, 2021, the Mayor and City Commission adopted the designation of the North Beach Bandshell Historic Site on second reading public hearing, Ordinance 2021-4449.

II. DESIGNATION PROCESS

The process of historic designation is delineated in Sections 118-591 through 118-593 in Subpart B of the Land Development Regulations of the City Code (Chapter 118, Article X, Division 4). An outline of this process is delineated below.

Step One: A request for designation is made either by the City Commission, the Historic Preservation Board, other agencies and organizations as listed in the Land Development Regulations of the City Code, or the property owners involved. Proposals for designation shall include a completed application form available from the Planning Department.

Step Two: The Planning Department prepares a preliminary evaluation report with recommendations for consideration by the Board.

Step Three: The Historic Preservation Board considers the preliminary evaluation to determine if proceeding with a designation report is warranted. The designation report is an historical and architectural analysis of the proposed district or site. The report:

- 1) describes the historic, architectural and/or archeological significance of the property or subject area proposed for Historical Site or District designation;
- 2) recommends Evaluation Guidelines to be used by the Board to evaluate the appropriateness and compatibility of proposed Developments affecting the designated Site or District; and
- 3) will serve as an attachment to the Land Development Regulations of the City Code.

Step Four: The City Commission is notified of the Board's decision and the initial boundaries proposed for designation. Within 60 days of the vote of the Historic Preservation Board to direct the Planning Department to prepare a designation report, the City Commission may, by a five-sevenths vote, deny or modify the proposed request for designation.

Step Five: The designation report is presented to the Historic Preservation Board at a public hearing. If the Board determines that the proposed site or district satisfies the requirements for designation as set forth in the Land Development Regulations of the City Code, the Board transmits a recommendation in favor of designation to the Planning Board and City Commission.

Step Six: The Planning Board will hold a public hearing on the proposed designation, and shall consider the proposed historic designation as an amendment to the Land Development Regulations of the City Code and, subsequently, transmit its recommendation to the City Commission.

Step Seven: The City Commission may adopt an amendment to the Land Development Regulations of the City Code by a five-sevenths majority vote, which thereby designates the Historic Preservation Site or Historic District after one (1) public hearing for a parcel of land less than ten (10) contiguous acres or after two (2) public hearings for a parcel of land that is more than ten (10) contiguous acres.

III. RELATION TO ORDINANCE CRITERIA

1. In accordance with Section 118-592 in the Land Development Regulations of the City Code, eligibility for designation is determined on the basis of compliance with the listed criteria set forth below.

- (a) The Historic Preservation Board shall have the authority to recommend that properties be designated as historic buildings, historic structures, historic

improvements, historic landscape features, historic interiors (architecturally significant public portions only), historic sites or historic districts if they are significant in the historical, architectural, cultural, aesthetic or archeological heritage of the city, the county, state or nation. Such properties shall possess an integrity of location, design, setting, materials, workmanship, feeling or association and meet at least one (1) of the following criteria:

- (1) Association with events that have made a significant contribution to the history of the city, the county, state or nation;
 - (2) Association with the lives of persons significant in the city's past history;
 - (3) Embody the distinctive characteristics of an historical period, architectural or design style or method of construction;
 - (4) Possesses high artistic values;
 - (5) Represent the work of a master, serve as an outstanding or representative work of a master designer, architect or builder who contributed to our historical, aesthetic or architectural heritage;
 - (6) Have yielded, or are likely to yield information important in pre-history or history;
 - (7) Be listed in the National Register of Historic Places;
 - (8) Consist of a geographically definable area that possesses a significant concentration of sites, buildings or structures united by historically significant past events or aesthetically by plan or physical development, whose components may lack individual distinction.
- (b) A building, structure (including the public portions of the interior), improvement or landscape feature may be designated historic even if it has been altered if the alteration is reversible and the most significant architectural elements are intact and repairable.
- (c) The historic preservation board shall consider if the historic buildings, historic structures, historic improvements, historic landscape features, historic interiors (architecturally significant public portions only), historic sites, or historic districts comply with the sea level rise and resiliency review criteria in chapter 133, article II, as applicable.
2. The proposed North Beach Bandshell Historic Site is eligible for historic designation as it complies with the criteria as specified in Section 118-592 in the Land Development Regulations of the City Code outlined above.

Staff finds that the proposed North Beach Bandshell Historic Site located at 7275 Collins Avenue possess integrity of location, design, setting, materials, workmanship, feeling or association for the following reasons:

The construction of the North Beach Bandshell located at 7275 Collins Avenue in 1961, was clearly significant in the highly successful post WWII development period of the City of Miami Beach. The proposed historic site still possesses the integrity of its original location at 7275 Collins Avenue, despite sixty years of hurricanes, storms and economic downturns. Further, the structure retains many of its historic materials, details and workmanship as well as the character of its post WWII period of construction.

(a) Further, staff finds the proposed historic site to be eligible for historic designation and in conformance with the designation criteria for the following reasons:

(1) **Association with events that have made a significant contribution to the history of the city, the county, state or nation.**

The construction of the North Beach Bandshell directly reflects the turn of events in America following World War II (WWII). The advent of reliable and affordable mass-produced automobiles and air transportation and the introduction of air-conditioning during the early mid-century period, made year-round resort living in South Florida highly desirable and practical, as well as within the reach of America's middle class. The booming post war economy gave the growing middle class more leisure time leading to increased tourism and the construction of modern entertainment venues.

Financial prosperity combined with a strong sense of optimism led to a nationwide focus on the arts and entertainment in the two decades following the end of the war. Miami Beach, particularly along Collins Avenue north of 43rd Street, became a magnet for live entertainment in the 1950s and 1960s. The construction of the North Beach Bandshell in 1961, is directly associated with events that followed WWII.

(3) **Embody the distinctive characteristics of a historical period, architectural or design style or method of construction.**

The North Beach Bandshell embodies the distinctive characteristics of the Post War Modern style of architecture, the style of choice used by successful developers in the period that followed World War II in Miami Beach as well as other areas of South Florida. The design of the Bandshell incorporates sculptured concrete forms, decorative cast concrete breeze block large, curved concrete stage, floating cantilevered concrete canopies. This open-air performing arts facility was sensitively designed to respond to its unique tropical location in Miami Beach.

(4) **Possesses high artistic values.**

The North Beach Bandshell, with its dramatic use of soaring concrete columns, acute angles and sweeping roof line, exemplifies high artistic values. A 2002 exhibit launched by the Municipal Art Society at the Urban Center Galleries on Madison Avenue entitled, "Beyond the Box – Mid-Century Modern Architecture in Miami and New York," which featured the North Beach Bandshell, underscores the high artistic value of the architecture.

(5) **Represent the work of a master, serve as an outstanding or representative work of a master designer, architect or builder who contributed to our historical, aesthetic or architectural heritage.**

The North Beach Bandshell was designed by Norman Giller, a prominent local architect who also designed among others, the Carillon Hotel, Bombay Hotel and original Diplomat Hotel in Ft. Lauderdale (now demolished).

(b) **A building, structure (including the public portions of the interior), improvement or landscape feature may be designated historic even if it has been altered if the alteration is reversible and the most significant architectural elements are intact and repairable.**

The North Beach Bandshell complex retains a high degree of architectural integrity with very limited modifications.

3. The historic preservation board shall consider if the historic buildings, historic structures, historic improvements, historic landscape features, historic interiors (architecturally significant public portions only), historic sites, or historic districts comply with the sea level rise and resiliency review criteria in Chapter 133, Article II, as applicable, pursuant to Section 118-592.

(a) Criteria for ordinances, resolutions, or recommendations:

(1) **Whether the proposal affects an area that is vulnerable to the impacts of sea level rise, pursuant to adopted projections.**

The adopted projections are the following:

At Mean High Water, Sea Level Rise is projected to be (NGVD Elevations):

- 2.31 to 2.64 by 2030 (near-term)
- 2.98 to 3.98 by 2060 (mid-term)
- 4.39 to 6.89 by 2100 (long-term)

[ESTIMATED from LIDAR and 1995 Partial Building Records] The structure is located on a site that is at an elevation of approximately 7.0' NGVD. The ground floor elevation has not been determined.

(2) **Whether the proposal will increase the resiliency of the City with respect to sea level rise.**

The proposal complements near and mid-term efforts to increase the resiliency of the City with respect to sea-level rise. Reevaluation may be necessary in the future for long-term effects (year 2100 and beyond).

(3) **Whether the proposal is compatible with the City's sea level rise mitigation and resiliency efforts.**

The proposal is compatible with the City's near and mid-term efforts to increase the resiliency of the City with respect to sea-level rise.

IV. DESCRIPTION OF BOUNDARIES

The proposed historic site is located at 7275 Collins Avenue (the northwest corner of Bandshell Park). (MAP 1)

V. PRESENT OWNERS

The present owner of the property is the City of Miami Beach.

VI. PRESENT USE

Municipal park.

VII. PRESENT ZONING

The established zoning district within the boundaries of proposed historic site is as follows:

GU Government Use

Please refer to the zoning map for more detailed information. (MAP 2)

VIII. HISTORICAL BACKGROUND

Long before the incorporation of Miami Beach in 1915, even before this desolate barrier island became a coconut plantation, the Biscayne House of Refuge was built near present-day 72nd Street (just south of what would become the future site of the North Beach Bandshell). It was one of five stations constructed by the United States Lifesaving Service (a precursor to the Coast

Guard) along Florida's southeast coast in 1876. These stations usually housed a keeper and his family, and they provided shelter and food for shipwrecked mariners.¹

It is widely believed that the Biscayne House of Refuge was the first formal structure erected on the barrier island now known as Miami Beach.² It was also the birthplace of Richard Peacock, son of the keeper at that time. Born on November 4, 1886, he is reputedly the first person born in what would later become Miami Beach.

Soon after its construction, the Biscayne House of Refuge played a part in the coconut plantation project of 1882 when New Jersey entrepreneurs Elnathan Field, Ezra Osborn, and Henry Lum purchased about 60 miles of oceanfront land extending from Key Biscayne to Jupiter, Florida. A mobile work crew planted this land with over 300,000 coconuts that were brought by boat from the Caribbean. The first camp site for the coconut planting operations was located in the area of today's Lummus Park; subsequent camp sites were positioned at the Biscayne House of Refuge in Miami Beach and then the Ft. Lauderdale House of Refuge (about nine miles south of the Hillsboro Inlet). Although the project did not succeed commercially, it was the first attempt at development of the City and it led to other, more successful endeavors aimed at tourism.

Biscayne House of Refuge, ca. 1925

¹ Miami Library, Florida Room, "The Biscayne House of Refuge," Journal of the Historical Association of Southern Florida, June 1975, pp. 4-5.

² Ruby Leach Carson, "Forty Years of Miami Beach," Tequesta, Historical Association of Southern Florida, volume XV, 1955, pp. 6-7.

The Biscayne House of Refuge was originally built on a 10-acre strip of oceanfront land claimed for the United States government by an executive order from President Ulysses S. Grant in 1875. The Department of the Interior increased the government's land holdings to extend from the Atlantic Ocean to Biscayne Bay in 1891. In 1921, President Warren G. Harding issued an executive order to restore part of this tract to the public domain (to become known as Harding Townsite), and a 500 foot-wide strip was retained for use by the United States Coast Guard (established in 1915).³ The Coast Guard tract was 22 acres in size and spanned from the ocean to the bay between what is now 72nd Street and 73rd Street.

In 1922, a survey revealed that the Biscayne House of Refuge, which consisted of the main building, a boathouse, and an observation tower, had mistakenly been built a short distance south of the parcel of land the United States government had claimed for its site.⁴ Consequently, the Biscayne House of Refuge was moved the following year from its original location just south of 72nd Street northward about 200 feet onto the government-owned tract of land.⁵ This area was located in unincorporated Dade County at that time. When Miami Beach was incorporated in 1915, the northern city limits were set along the midline of State-surveyed Sections 22 and 23 near present-day 46th Street.⁶ The house of refuge and the future site of the North Beach Bandshell did not become a part of Miami Beach until July 1, 1924, when the northern city limit was extended to its present location at 87th Terrace.⁷

The Biscayne House of Refuge remained in use until September of 1926 when it was heavily damaged in the great hurricane and subsequently demolished. The only house of refuge that survives today is located at Gilbert's Bar near Stuart, Florida. As times changed, property values rose in North Beach, and the Coast Guard left the federal reservation idle and overgrown. Many appeals were made for the release of this land from government ownership, but the original 1875 decree prohibited its sale. Finally, in 1941, the Coast Guard exchanged this property for the site of its present station on Causeway Island, and the land between 72nd Street and 73rd Street came into the possession of the City of Miami Beach for use as a public park.⁸ It appears that the former Coast Guard property was first named Surfside Park⁹; however, it was later renamed to North Shore Park by 1952.¹⁰

In 1942, the City of Miami Beach erected a lifesaving and comfort station on the beach in the new park (just southeast of what would become the future site of the bandshell). It was designed by August Geiger and built by Wilbert Harborn for a cost of \$18,000. The floor plan of the building was organized around a central hospital room with a squad room on the north end and a storage room on the south end. Bathroom facilities were located on the far north and south

sides of the structure. The 1-story building was symmetrically designed with a central section and two side wings that were lower in height. It featured multiple hipped roofs with flat tile, double-hung sash windows, heavy wood-paneled doors, wooden shutters, side entrances with thick masonry sidewalls, and a large porch facing the ocean. In 1974, the structure was enlarged and significantly altered to adapt to a new use as a community center.¹¹

In 2010, the 1942 building was demolished and replaced by a new 2-story community center designed by architect Rene Gonzalez. This new community center was approved by the Design Review Board in 2008 and completed in 2013.¹²

IX. ARCHITECTURAL BACKGROUND

The Post War Modern Style of Architecture in Miami Beach (about 1945 to 1967)

In order to better understand the Post War Modern or Miami Modern (MiMo) style of architecture, it is important to view this architectural movement in the context of the historical, political, social, economic, and technological changes that were taking place during this period worldwide, nationwide, and locally.

Between 1942 and 1945 Miami Beach played a significant role WWII. Nearly half a million men took over more than 300 hotels and apartment buildings for housing and training headquarters by the Army Air Forces Technical Training Command. By the time the war ended, one-fourth of all Army Air Force officers and one-fifth of the military's enlisted men had been trained in Miami Beach. Hotel rooms became barracks, hotel dining rooms became mess halls, a movie theater became a testing center, hotels became administrative offices, hotel pools and the ocean were used to teach life saving techniques, golf courses became parade grounds, and the beach was used for rifle ranges and physical training. Another group of hotels and buildings served as an Army Redistribution Station for infantrymen returning from battle. Many of the buildings are still in operation today and are visited by thousands of tourists each year.

Many of these young servicemen and women returned after the war. The influx of new residents and visitors resulted in a housing construction boom during the 1950s, when hundreds of Post War Modern style buildings were erected throughout the City.

Architectural Description

After a hiatus in construction due to World War II, the Post-War Modern style picked up where Art Deco left off with the added influences of a booming post-war economy, new technologies such as air conditioning, the prevalence of the sophisticated, affordable, and reliable new automobiles, and a feeling of national optimism. The local expression of this style was dubbed Miami Modern or MiMo by the Greater Metropolitan Miami area's Urban Arts Committee in about 2004 (much as the term Art Deco was first applied about 1965 when the style actually first appeared in the 1920s).

¹¹ City of Miami Beach, Building Department, Building Permit Cards 68 and 94.

¹² City of Miami Beach, Planning Department, DRB File No. 21559

From about 1948 to 1966, the widely popular Post-War Modern style was frequently applied to hotels, commercial buildings, apartment houses, and single family homes throughout Miami Beach. Post War Modern style buildings generally made an extensive use of glass and poured concrete. They often mixed two or more textured surfaces together (i.e. stucco with stone, brick, or mosaic tile as well as contrasting smooth and patterned stucco surfaces). The style featured such dramatic elements as accordion-like folded plate roofs and walls, acute as well as subtle angles, dynamic parabolas, delta wing shapes, sweeping curved walls, and soaring pylons. Other commonly occurring design elements and materials that were added to the architectural vocabulary of the Post War Modern style structures included: brise soleil, architectural accents with exotic themes and often wall sculptures in relief, brick or stone faced feature areas, cast concrete decorative panels with geometric patterns, and a remarkable use of architectural 'breeze block' in a wide variety of design patterns lending itself so well to natural air flow in this tropical environment. Architect Morris Lapidus further expanded the architectural language of this style when he made popular "cheese holes", "woggles", and "beanpoles".

The hotels in the Post-War Modern style often incorporated an expansive use of glass curtain walls, cantilevered asymmetrical roofs, leaping arches, dramatic fin walls, floating planes, architectural bridges, and grand entrance porte cocheres. Primary facades were sometimes graced with bold neon signs or logos in order to catch the eye of passing motorists. Sometimes, "sky signs" were mounted on rooftop features or on parapet walls. Color was an essential ingredient of signage. The fenestration was often highlighted with boxed or corner windows, as well as continuous ribbon windows and eyebrows. The hotels often took on exotic or futuristic forms, using architecture as advertising in an effort to outdo one another in competing for business.

Architect

Norman M. Giller (d. 2008), was born in Jacksonville, Florida, in 1918. Giller earned a degree in architecture from the University of Florida in 1945. He apprenticed with Henry Hohaus and Albert Anis during the early 1940's in Miami Beach. After World War II, Giller became one of South Florida's most influential and inventive architects of the Post-War Modern style.

Some of his best-known works include:

Bombay Hotel – 6901 Collins Avenue, 1951

Giller Building – 975 41st Street, 1957

Carillon Hotel – 6801 Collins Avenue, 1957

Diplomat Hotel (now demolished) – 3555 South Ocean Drive, Hollywood, 1957

North Beach Bandshell – 7275 Collins Avenue

The North Beach Bandshell, originally known as the North Shore Community Center, is located within Bandshell Park on Collins Avenue between 72nd and 73rd Streets, adjacent to the beach and the Atlantic Ocean. Designed by the renowned Miami Beach architect Norman Giller in 1961, the bandshell is an excellent example of the Post War Modern or Miami Modern (MiMo) style of architecture. The bandshell was designed as an open-air facility to host a variety of civic and community activities. Comprised of sculptured concrete forms, the bandshell complex is

designed as an amphitheater with a central circular terrazzo dance floor surrounded by a semi-circular area for seating and a central stage. A perimeter wall capped with decorative cast concrete breeze block encircles the amphitheater complex. The large, curved concrete stage is flanked by two side entrances, each detailed with large cantilevered concrete canopies that appear to float, and a main gate that is on axis with the stage and enclosed in a tower of curved columns. This open-air performing arts facility was sensitively designed to respond to its unique tropical location in Miami Beach. The highly spirited open form of its architecture integrates artfully with its coconut palm setting by the sea.

Photograph, Mike Douglas Show, 1975

Between 2009 and 2011, the Bandshell facility was restored and renovated by the City including the replacement of the eastern shed structure with a new 1-story back of house addition. In 2019, the Design Review Board reviewed and approved plans for the introduction of a new circular shade canopy structure designed by Todd Dalland of Pvilion Technologies in consultation with Ira Giller, Norman Giller's son.

X. PLANNING DEPARTMENT RECOMMENDATIONS

1. **Criteria for Designation:** The Planning Department finds the proposed North Beach Bandshell Historic Site to be in compliance with the Criteria for Designation listed in Section 118-592 in the Land Development Regulations of the City Code.
2. **Site Boundaries:** The Planning Department recommends that the boundaries of the historic site consist of the Bandshell structure and additions located at 7275 Collins Avenue in Miami Beach. **(MAP 1)**
3. **Areas Subject to Review:** The Planning Department recommends that the areas subject to review shall include all exterior building elevations and public interior spaces, site and landscape features.
4. **Review Guidelines:** The Planning Department recommends that a decision on an application for a Certificate of Appropriateness shall be based upon compatibility of the physical alteration or improvement with surrounding properties and where deemed applicable in substantial compliance with the following:
 - a. The Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings, as revised from time to time;
 - b. Other guidelines/policies/plans adopted or approved by resolution or ordinance by the City Commission;
 - c. All additional criteria as listed under Sections 118-564(b), 118-564(c) and 133-50(a) in the Land Development Regulations of the City Code;
 - d. City of Miami Beach Design Guidelines as adopted by the Joint Design Review/Historic Preservation Board on October 12, 1993, amended June 7, 1994, as may be revised from time to time.
